

Service Manual

ORDER NO.
RRV1346

FM/AM DIGITAL-SYNTHESIZER TUNER

F-504RDS

F-504RDS-G

THIS MANUAL IS APPLICABLE TO THE FOLLOWING MODEL(S) AND TYPE(S).

Type	Model		Power Requirement	The voltage can be converted by the following method.
	F-504RDS	F-504RDS-G		
HBWXX	○	-	AC 230V	AC 240V, *
HEIXK	○	○	AC 220 - 230V	AC 240V, *
HEWZXX	○	-	AC 220 - 230V	AC 240V, *
HZXX	-	○	AC 220 - 230V	AC 240V, *

* : Alter the wiring of the Power-supply block at the primary winding of Power-transformer referring to the "Line Voltage Selection" described in Service Manual.

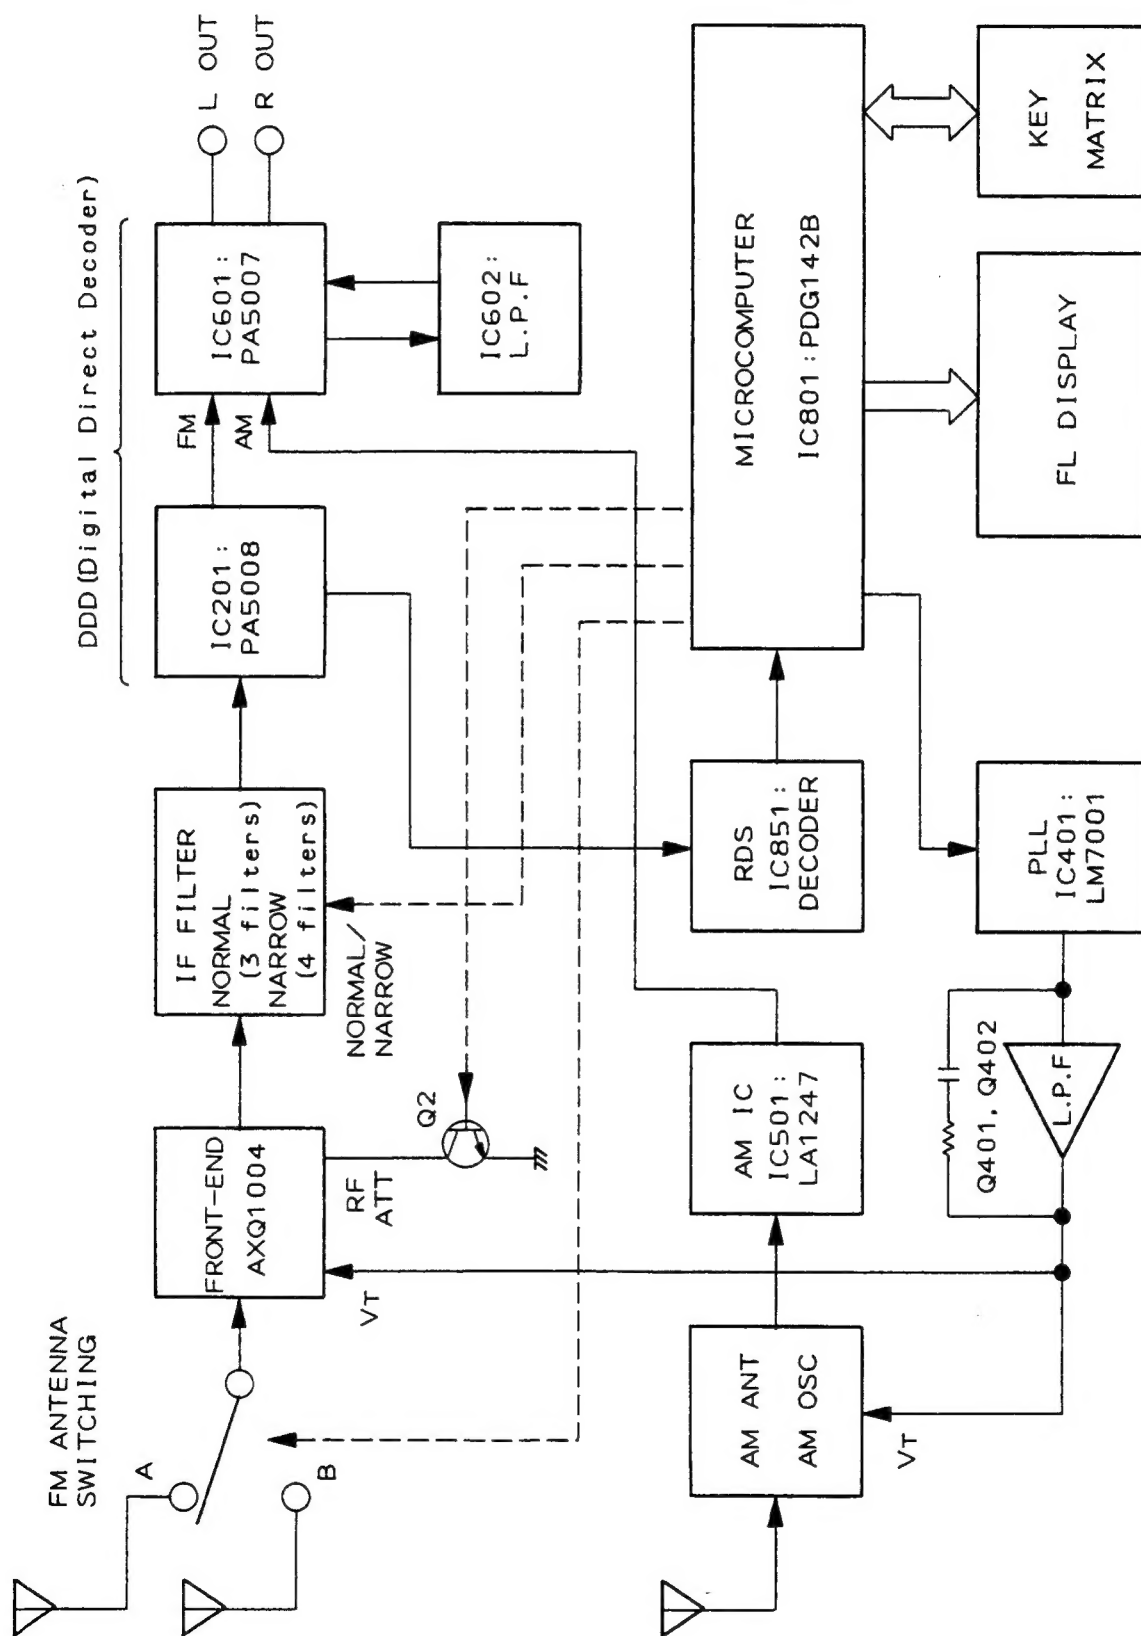

- F - 504RDS - G is the same as F - 504RDS except for color.

2. PACKING AND PARTS LIST

NOTES:

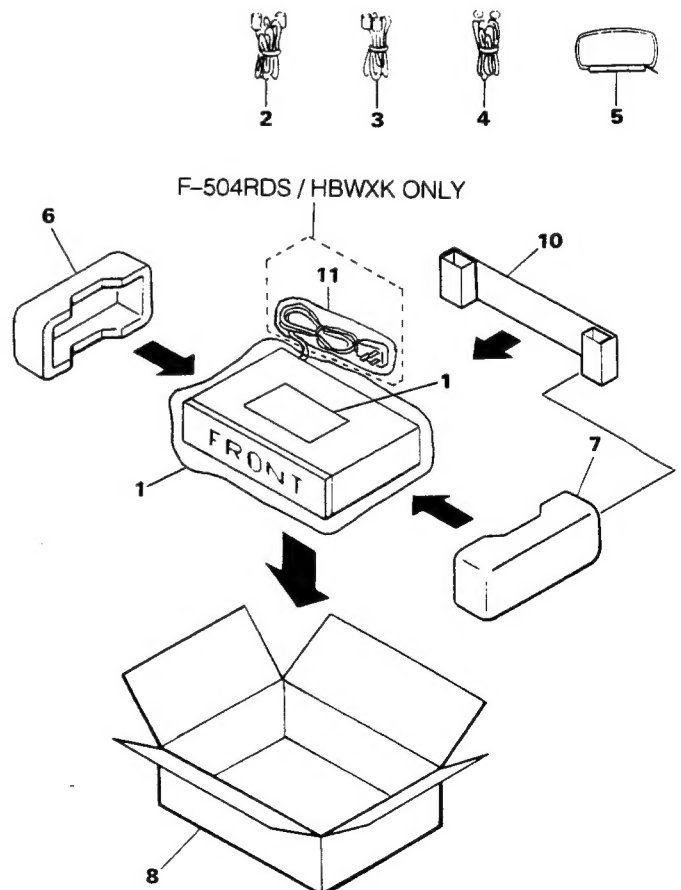

- Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.
- The Δ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Parts marked by "◎" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.

■ **CONTRAST OF F-504RDS/HBWXX, HEIXK, HEWZXX, F-504RDS-G/HZXX AND HEIXK**
 F-504RDS/HBWXX, HEIXK, HEWZXX, F-504RDS-G/HZXX and HEIXK have the same construction except for the following :

Mark	No.	Symbol & Description	Part No.					Remarks
			F-504RDS/ HBWXX	F-504RDS/ HEIXK	F-504RDS/ HEWZXX	F-504RDS-G/ HZXX	F-504RDS-G/ HEIXK

5. SCHEMATIC AND PCB CONNECTION DIAGRAMS

5.1 OVERALL SCHEMATIC DIAGRAM

SCH-1

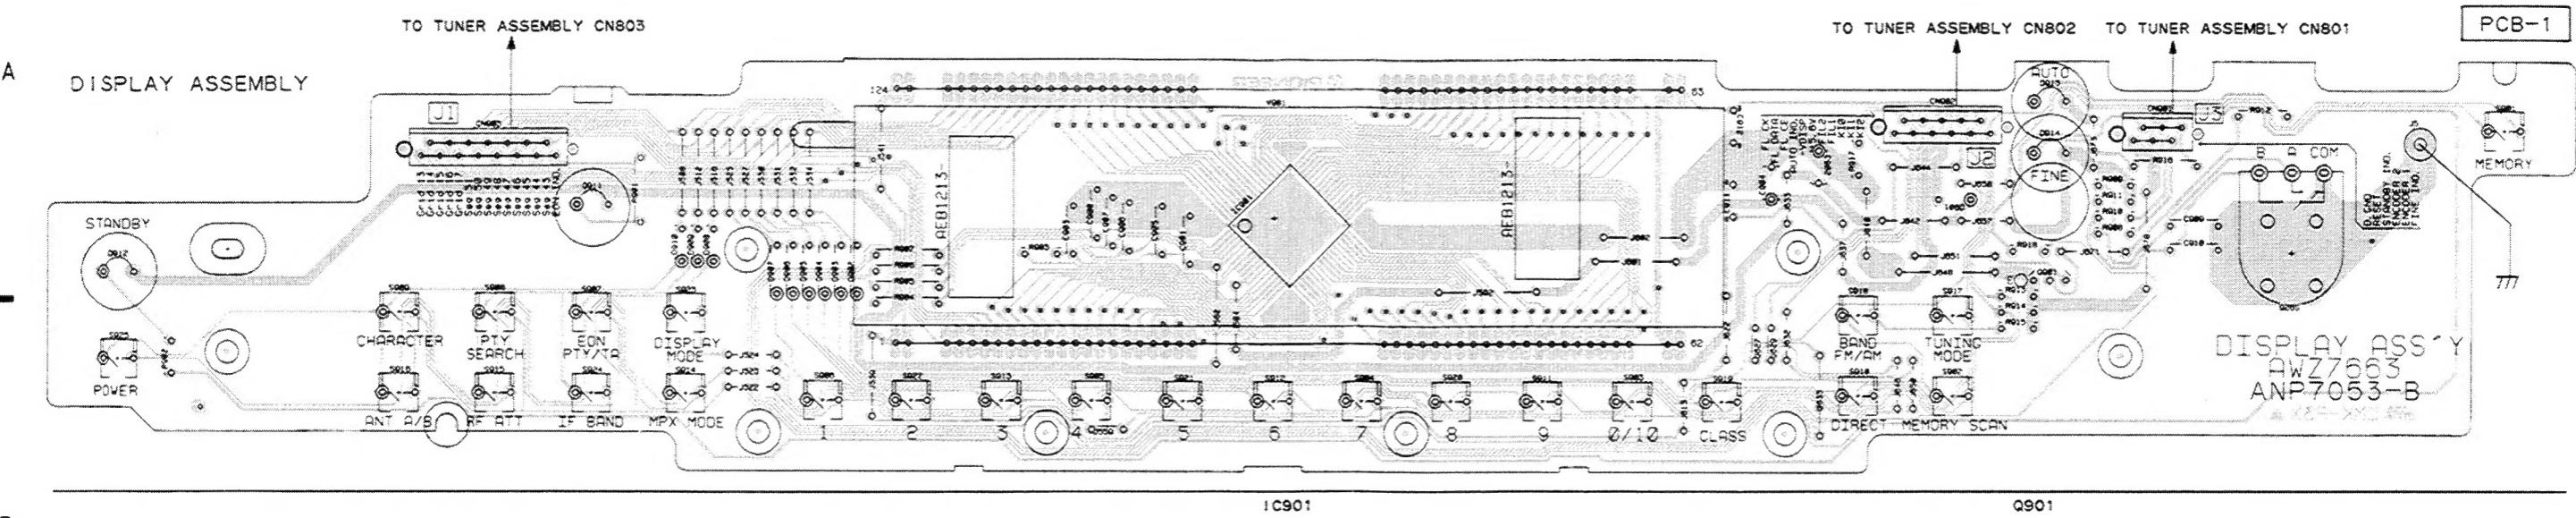

OVERALL SCHEMATIC DIAGRAM

OVERALL SCHEMATIC DIAGRAM

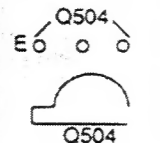

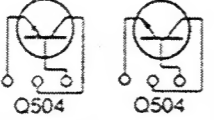

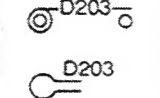

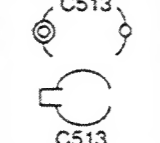

SCH-1

5.2 DISPLAY ASSEMBLY

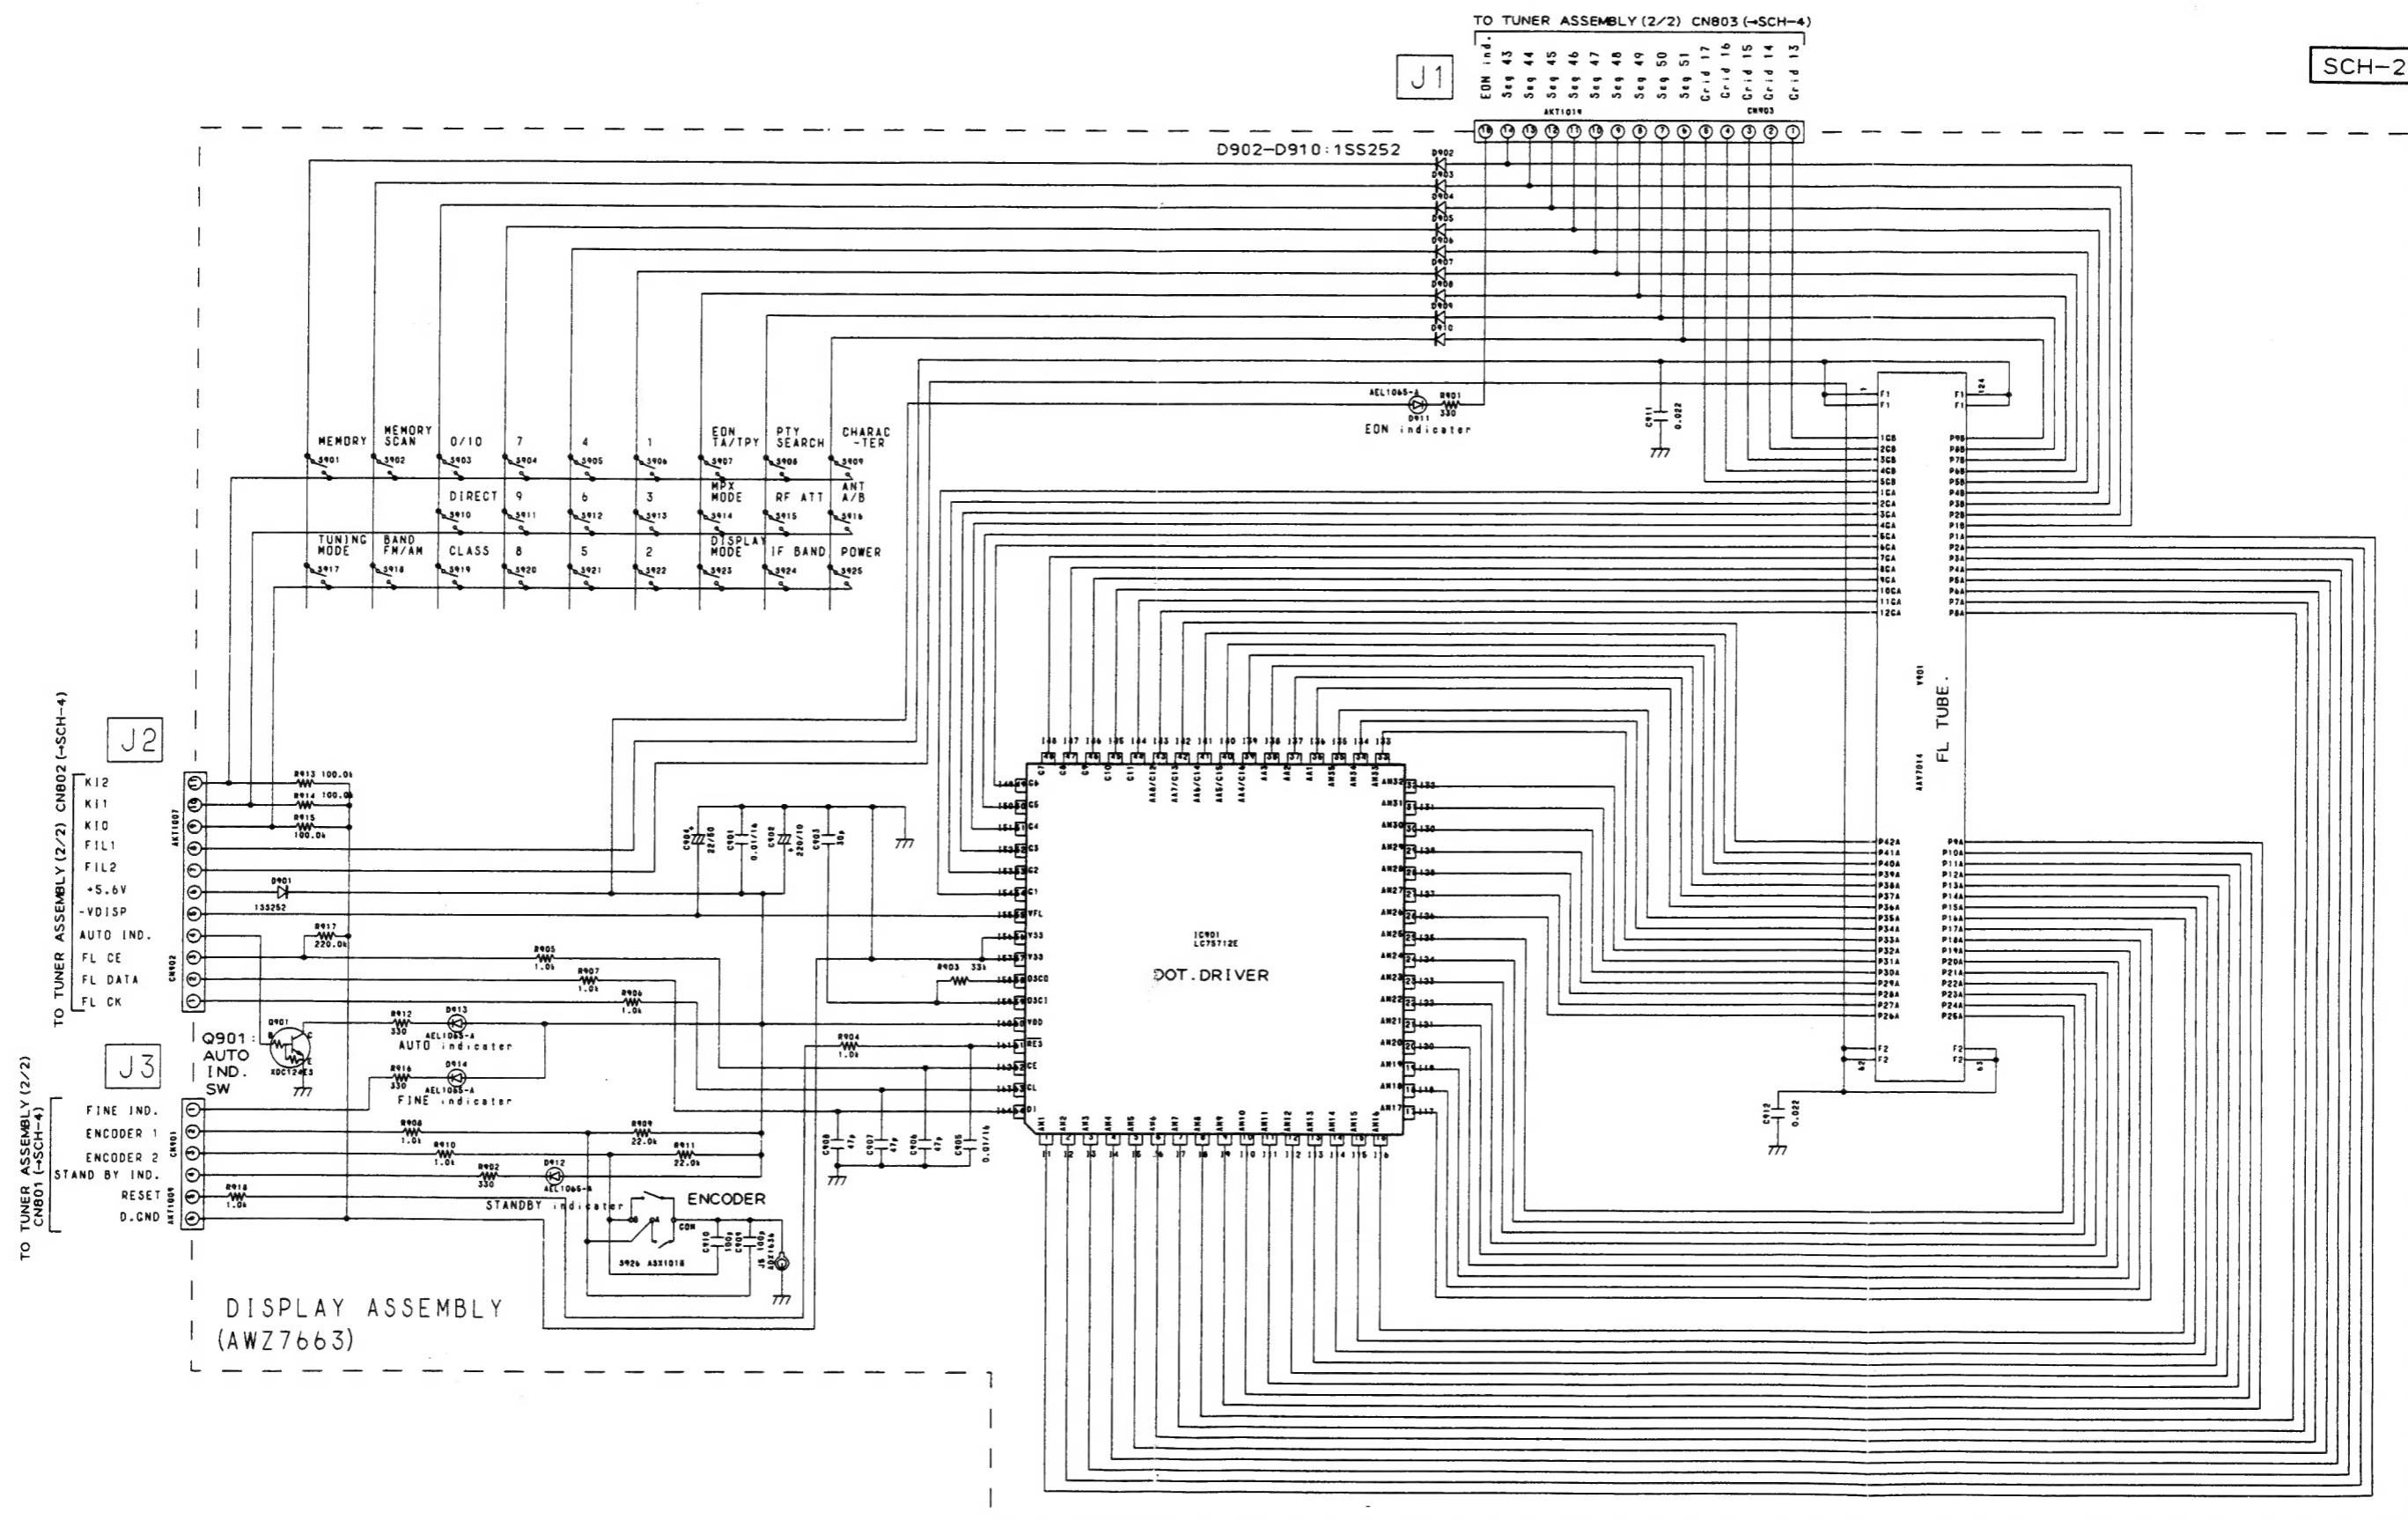

● This diagram is viewed from the mounted parts side.

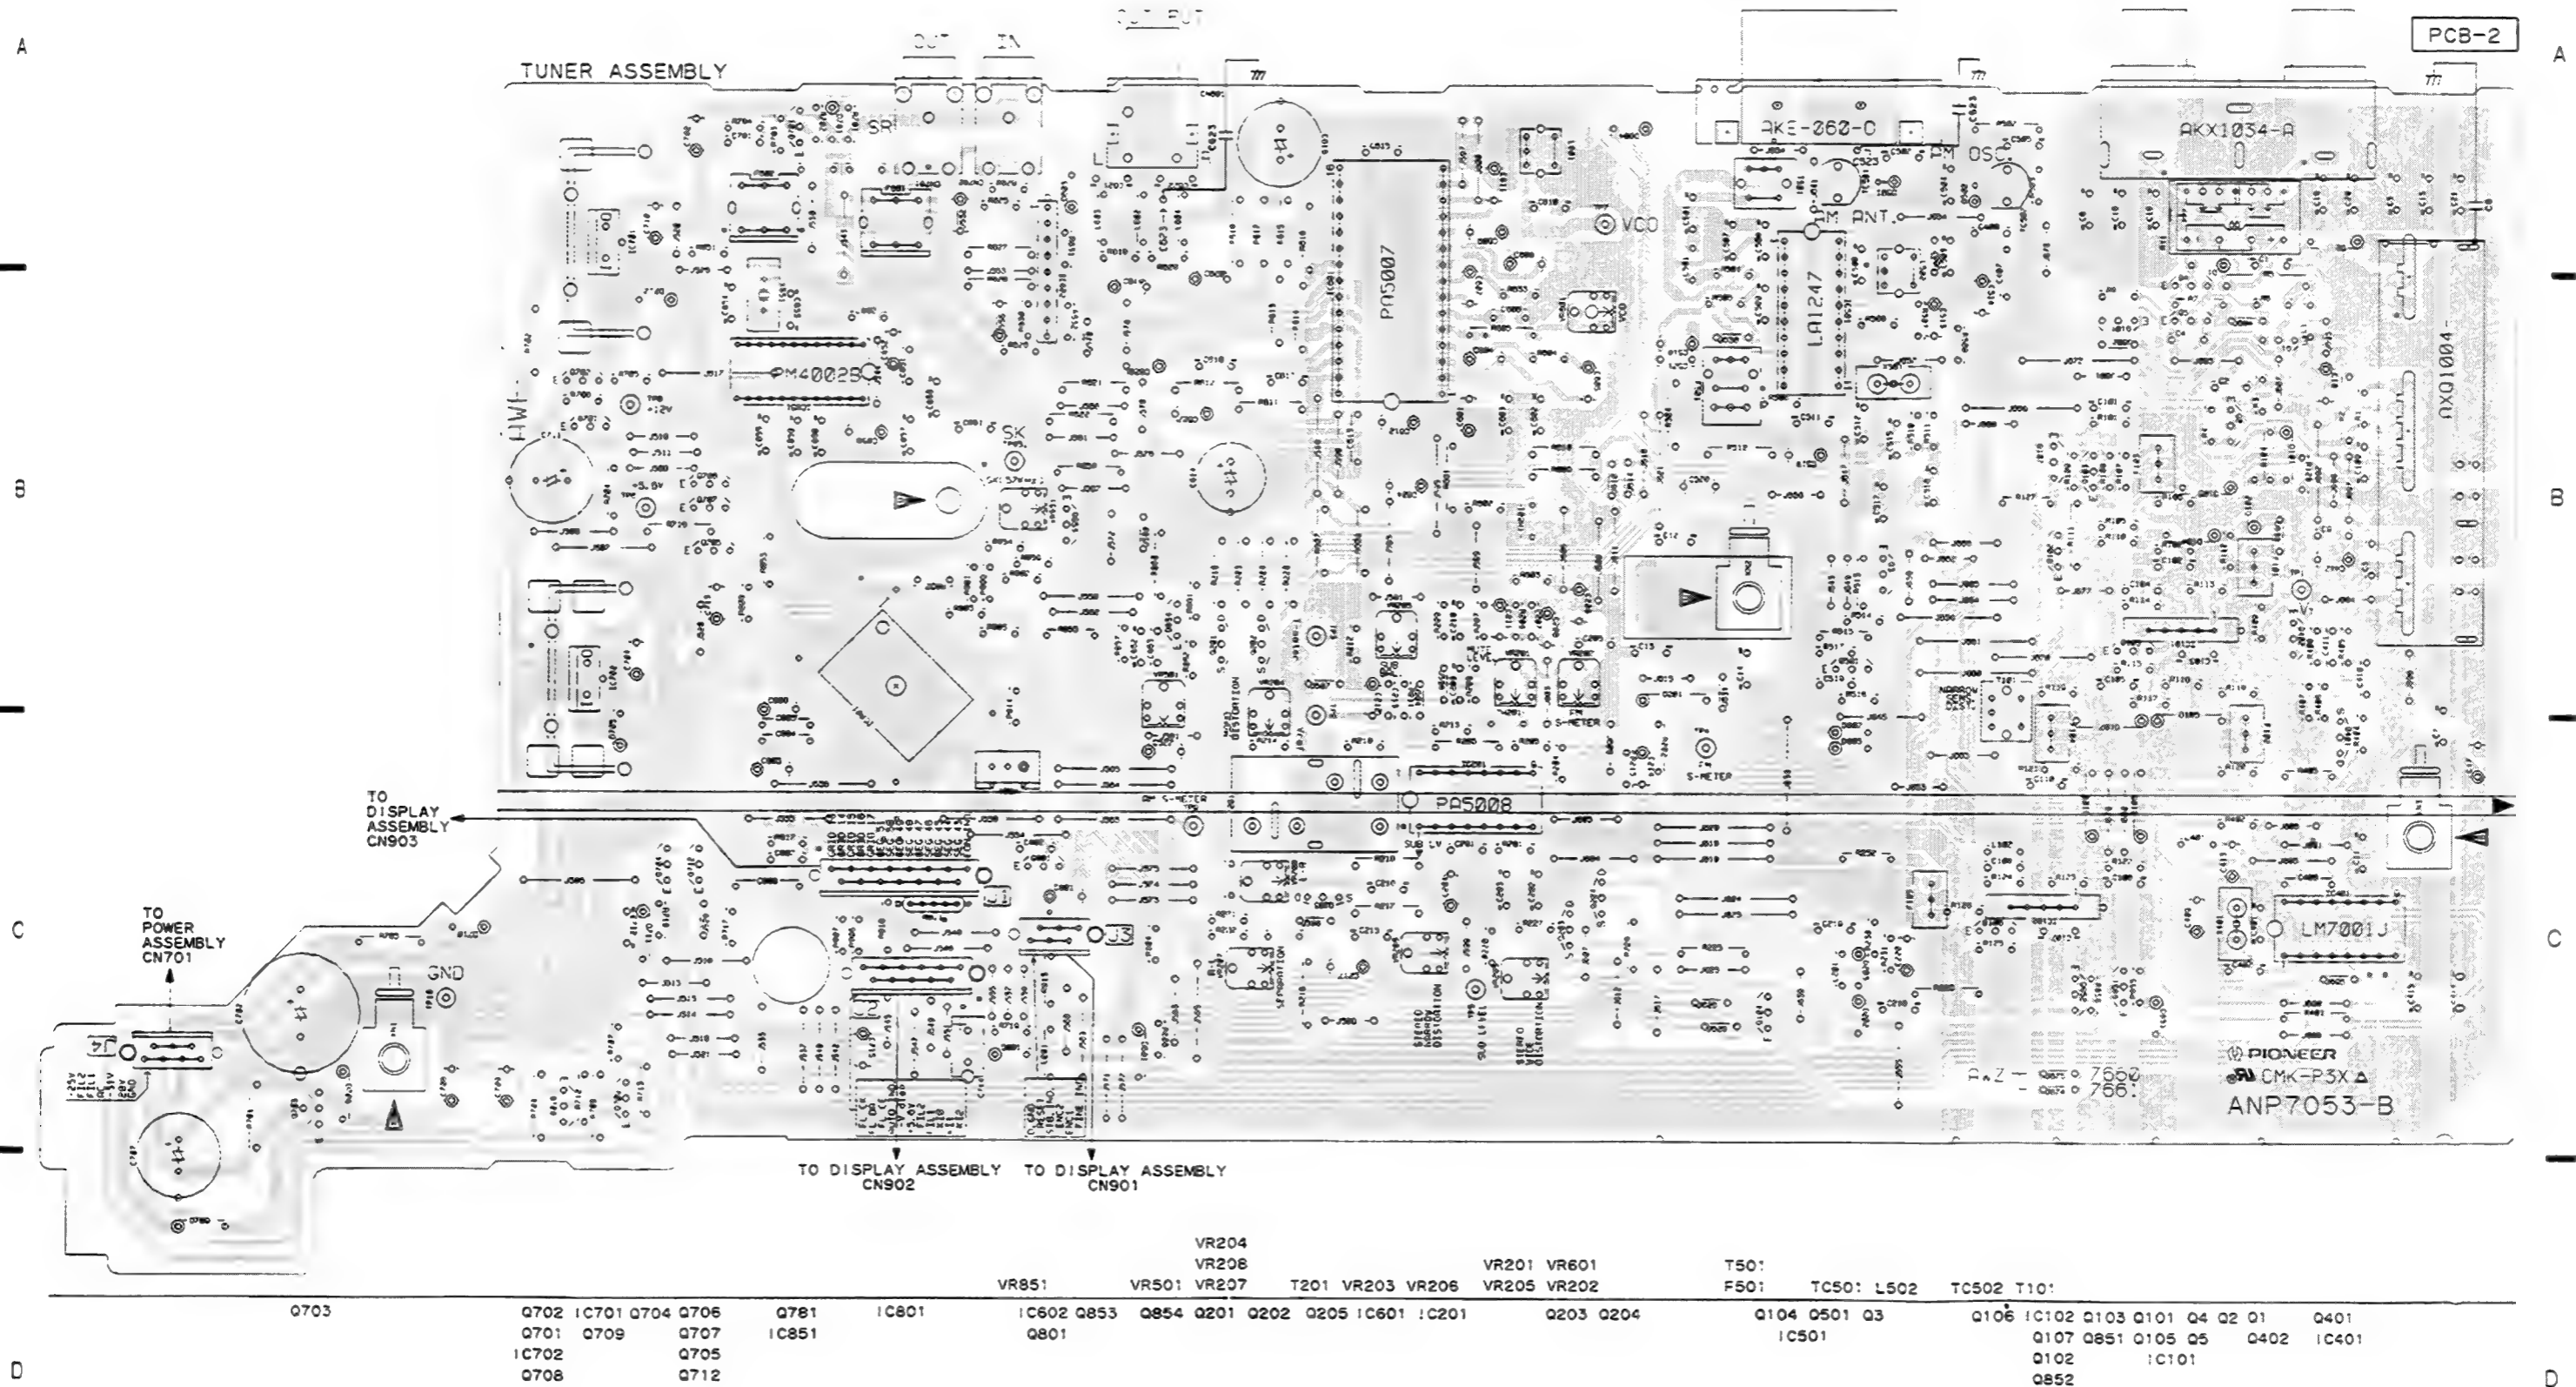

- NOTE FOR PCB DIAGRAMS:
1. Part numbers in PCB diagrams match those in the schematic diagrams.
 2. A comparison between the main parts of PCB and schematic diagrams is shown below.

Symbol in PCB Diagrams	Symbol in Schematic Diagrams	Part Name
		Transistor
		Diode
		Capacitor (Polarized)

3. The transistor terminal marked with E or  shows the emitter.
4. The diode terminal marked with  or  shows cathode side.
5. The capacitor terminal marked with  or  shows negative terminal.
6. The parts mounted on each PCB include all necessary parts for several destinations. For further information for respective destinations, be sure to check with the schematic diagram.

● This diagram is viewed from the mounted parts side.

Line Voltage Selection

Line Voltage can be changed by the following modification:

1. Disconnect the AC power cord.
2. Remove the cover.
3. Change the position of the jumper-lines as follows.

Voltage	jumper—line ① position
220V—230V	①
240V	②

NOTE: When replacing a PCB which has the primary winding circuit of Power-transformer, be sure to compare its circuit with the diagram in Service Manual. jumper-lines on the PCB may have to be removed. Forgetting this check-up will cause a serious damage.

4. Stick a line voltage label on the rear panel.

Part No.	Description
AAX—193	220V label
AAX—192	240V label

6. PCB PARTS LIST

NOTES:

- Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.
- The Δ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Parts marked by "●" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.
- When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex.1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J = 5%, and K = 10%).

560 Ω \rightarrow 56 $\times 10^1$ \rightarrow 561 RD1/8PM $\boxed{561}J$
 47k Ω \rightarrow 47 $\times 10^3$ \rightarrow 473 RD1/4PS $\boxed{473}J$
 0.5 Ω \rightarrow 0R5 RN2H $\boxed{0R5}K$
 1 Ω \rightarrow 010 RS1P $\boxed{010}K$

Ex.2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62k Ω \rightarrow 562 $\times 10^1$ \rightarrow 5621 RN1/4PC $\boxed{5621}F$

7. ADJUSTMENTS

7.1 FM TUNER ADJUSTMENTS

- Connect the wiring as shown in Fig. 2.
- Set the function to FM BAND.

Step No.	Adjustment title	FM SG (1 kHz \pm 75 kHz dev.)			FL display, IF BAND etc.	Adjustment Location	Specifications
		Frequency (MHz)	Modulation	Level (dB μ V)			
1	T meter adjustment	99	MONO	60	99 MHz NORMAL	T201-B	Adjust so that the voltage between TP2 and TP3 becomes 0 ± 50 mV.
2	MONO distortion adjustment	99	MONO	60	99 MHz NORMAL	T201-A VR204	Adjust so that the distortion becomes minimum.
3	SUB-balance adjustment	99	MONO	60	99 MHz NORMAL	VR203	Adjust so that the AC voltage at TP5 becomes minimum.
4	VCO adjustment	108	OFF	60	108MHz NORMAL	VR601	Adjust so that the output at TP 7 becomes 38 kHz \pm 100Hz.
5	STEREO distortion adjustment (NORMAL)	89(*2)	L-ONLY	60	89 MHz NORMAL	VR205	Adjust so that the distortion becomes minimum.
6	STEREO distortion adjustment (NARROW)	89(*2)	L-ONLY	60	89 MHz NARROW	VR206	Adjust so that the distortion becomes minimum.
7	STEREO distortion adjustment (NARROW)	89(*2)	L-ONLY	60	89 MHz NARROW	T101	Adjust so that the distortion becomes minimum.
8	Repeat steps 6 and 7 until optimum adjustment is obtained.						
9	Separation adjustment	89(*2)	R-ONLY	60	89 MHz NORMAL	VR207	Adjust so that the separation R \rightarrow L becomes maximum.
10			L-ONLY	60	89 MHz NORMAL	VR208	Adjust so that the separation L \rightarrow R becomes maximum.
11	S meter adjustment	89	MONO	84	99MHz NORMAL	VR202	Adjust so that the voltage between TP4 and GND becomes 4.95 ± 0.05 V.
12	Muting level adjustment	99	MONO	12	99 MHz NORMAL	VR201	Adjust so that the muting is released at the input level shown on the left.
13	SK level adjustment	88	EXTERNAL *1 (RDS SG)	60	88 MHz NORMAL (ATT ON)	VR851	Adjust so that the voltage between TP851 and GND becomes maximum.

*1 : RDS SG (AUDIO, PILOT, RDS, BK and DK : OFF, SK : ON)

*2 : Stereo modulation : Main 1 kHz L+R, ± 68.25 kHz.

Pilot 19 kHz, ± 6.75 kHz.

7.2 AM TUNER ADJUSTMENT

- Connect the wiring as shown in Fig. 2.
- Set the function to AM BAND.

Step No.	Adjustment title	AM SG(400kHz, 30% modulation)		FL Display	Adjustment Location	Specifications
		Frequency(kHz)	Level(dBμV/m)			
1	Front-end VT adjustment	NO INPUT SIGNAL		531 kHz	L502	Adjust so that the voltage between TP1 and GND becomes 1.25 ± 0.1 V.
2				1602 kHz	TC502	Adjust so that the voltage between TP1 and GND becomes 10 ± 0.3 V.
3	Front-end sensitivity-up adjustment	603	Low input level	603 kHz	T501	Adjust so that the voltage between TP9 and GND becomes maximum.
4		1395		1395 kHz	TC501	
5	Repeat steps 3 and 4 until optimum adjustment is obtained.					
6	IFT adjustment	603	Low input level	603 kHz	F501	Adjust so that the voltage between TP9 and GND becomes maximum.
7	S meter adjustment	1008	100	1008 kHz	VR501	Adjust so that the voltage between TP9 and GND becomes 4.4 ± 0.1 V.

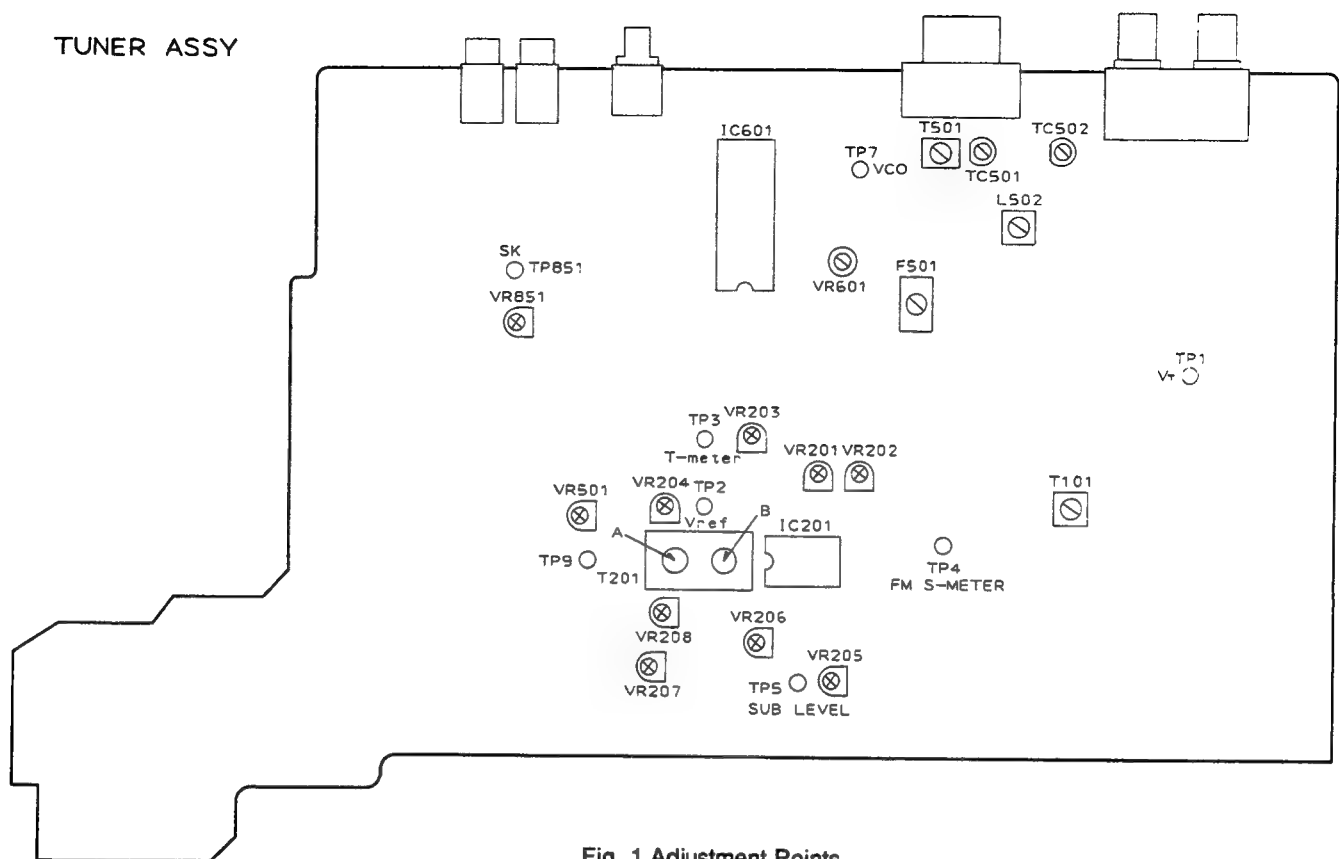

Fig. 1 Adjustment Points

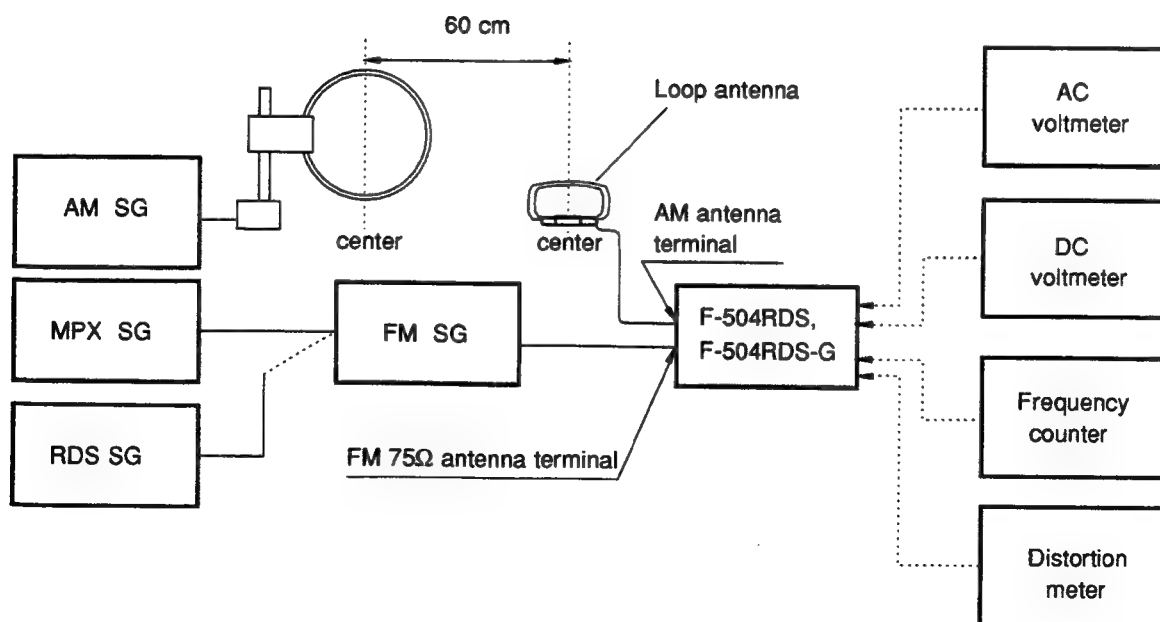

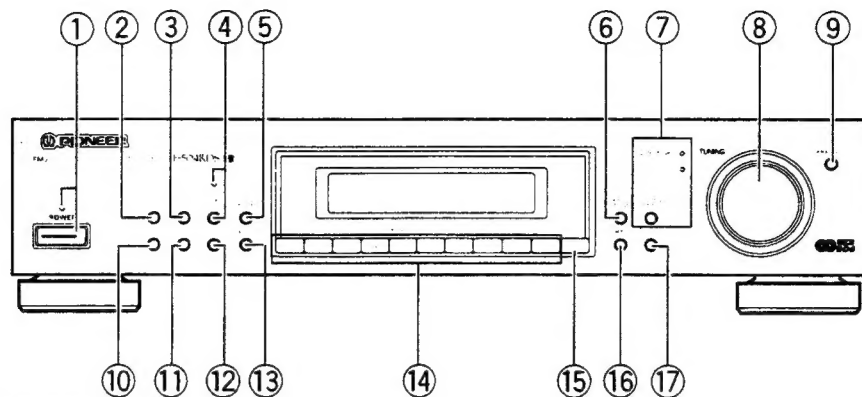

Fig. 2 Connection Diagram

8. PANEL FACILITIES

① POWER (STANDBY/ON) switch/indicator

This is the switch for electric power.

ON When set to ON position, power is supplied and the unit becomes operational.

STANDBY When set to STANDBY position, the main power flow is cut and the unit is no longer fully operational. A minute flow of power feeds the unit to maintain operation readiness. During standby, the STANDBY indicator lights up.

NOTE:

- The memory will be backed up so long as the power cord is unplugged.
- If the power cord is unplugged, the memory will be retained for several days.
- When not using the unit for a long period, disconnect the power cord.

② CHARACTER button

Press this button, "CHARACTER" is displayed, and the mode switches to manual station name input.

③ PTY SEARCH button

Press this button, "SEARCH" is displayed, and the mode switches to program type search.

④ EON PTY/TA button/indicator

If receiving a station broadcasting EON information, the radio can automatically keep track of broadcast information from other network stations. The EON indicator lights up when (TA) or (PTY) is specified.

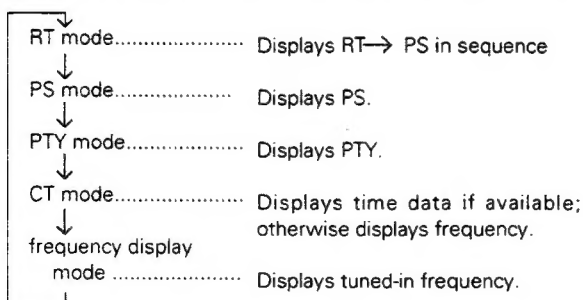

If you specify traffic information (TA) or program type (PTY) beforehand, the frequency will change automatically when the specified program begins.

The **[EON]** indicator of the display section lights up when EON information is received.

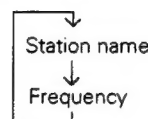

The TA/PTY characters of the display section and EON indicator blink when the specified (TA) or (PTY) broadcast is received.

⑤ DISPLAY MODE button

Each time you press this button, the mode changes as follows:

When receiving AM, valid only when the station name is memorized.

Does not show other displays. When no station name is memorized, the DISPLAY MODE button becomes invalid.

⑥ BAND FM/AM selector button

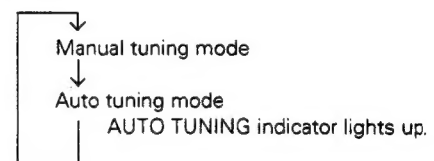

Each time you press this button, the band changes as follows:

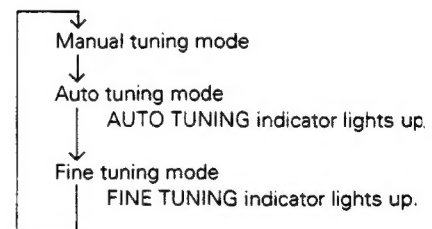

⑦ TUNING MODE button and AUTO TUNING • FINE TUNING indicators

Each time you press this button, the TUNING knob's function changes as follows.

AM:

FM:

NOTE:

- Switching to AM from the FM fine tuning mode will result in the manual tuning mode.
- These two indicators show the frequency mode changed to when the TUNING knob is rotated.

FRONT PANEL FACILITIES

⑧ TUNING knob

Use for tuning. To raise the frequency, turn in a clockwise direction; to lower the frequency, turn counterclockwise.

AM : Frequency changes in 9kHz steps.

FM : Frequency changes in 50 kHz steps when FINE TUNING is off, and 25 kHz steps when FINE TUNING is on.

In the Station Name input mode, and PTY Search mode and EON PTY MODE, use to select characters and program type.

⑨ MEMORY button

Use to preset stations.

This is also used for FM or AM broadcast manual station name character selection.

⑩ ANT A/B button

Selects between two antennas connected to the FM antenna A and B terminals. [ANT- **A**] or [ANT- **B**] indicator lights up.

NOTE:

This button's status is preset for each station in station memory.

⑪ RF ATT button

Set this button to on when receiving strong FM signals (nearby stations) to reduce sound distortion (RF ATT indicator lights).

Normally, this button should be set to off.

This button does not affect AM reception.

NOTE:

This button's status is preset for each station in station memory.

⑫ IF BAND button

Each time this button is pressed, the bandwidth of the IF circuit switches between "normal" and "narrow" for the FM band.

Set to NARROW in case of interference from other stations.

The NARROW indicator lights up. When not lit, normal filter bandwidth is selected.

This button does not affect AM reception.

NOTE:

This button's status is preset for each station in station memory.

⑬ MPX (multiplex) MODE button

This button does not affect AM reception.

AUTO:

"AUTO" is not displayed.

Normally leave in this mode for reception. When a stereo FM broadcast is received, it will be automatically reproduced in stereo sound and the STEREO indicator lights up.

NOTE:

When the signal level is too weak for reception, sound output is automatically muted.

MONO:

MONO indicator lights up.

To receive stereo broadcasts in monaural.

If there is too much noise during stereo reception of a weak signal, you can reduce the level of noise by switching to MONO.

NOTE:

This button's status is preset for each station in station memory.

⑭ STATION CALL buttons

Use these buttons to preset stations and to receive the already preset stations.

These are also used when performing direct access tuning.

⑮ CLASS button

Use to switch between preset memory classes 1 to 4. In each class, 10 stations can be memorized using the STATION CALL buttons, enabling a total of 40 stations to be memorized.

⑯ DIRECT button

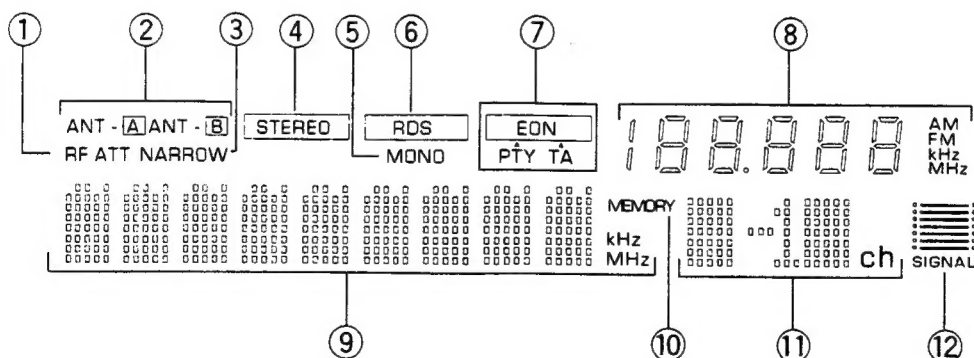

When this button is pressed, the STATION CALL buttons function as ten-key number buttons for direct input of the desired reception frequency. Press again to cancel this mode.

⑰ MEMORY SCAN button

This button is used for station memory scan.

Press to receive currently selected class and preset stations for a few seconds in sequence. Press again, and reception of the station presently begin received will continue.

OPERATING DISPLAY

① RF ATT indicator

Stays lit while RF ATT button is on.

② ANT - **A**, ANT - **B** indicator

This indicates the selected antenna.

③ NARROW indicator

Stays lit while IF BAND button is set to NARROW.

When not lit, stays NORMAL.

FRONT PANEL FACILITIES

④ STEREO indicator

Lights up when a stereo broadcast is received (the indicator does not light when the MPX MODE button is set to MONO).

⑤ MONO indicator

Stays lit while MPX MODE button is set to MONO.

⑥ RDS indicator

Lights when an RDS broadcast is received.

⑦ **EON** [△] **PTY** [△] **TA** indicator

When a station broadcasting EON information is received, **EON** lights. After specifying TA or PTY, interrupt waiting begins and the TA or PTY indicator lights.

⑧ Frequency display section

Displays the frequency when the frequency is not displayed at ⑨.

⑨ Character,CT(Clock Time),frequency display section

⑩ MEMORY indicator

⑪ Class and station display section

Shows the class selected by the CLASS button.

The current CLASS is displayed.

When a STATION CALL button is pressed, it will show the corresponding channel number.

⑫ SIGNAL indicator

9. SPECIFICATIONS

FM Tuner Section

Frequency Range	87.5 MHz to 108 MHz
Usable Sensitivity	
NORMAL	Mono: 12.1dBf, IHF(1.1 μ V/75 Ω)
50 dB Quieting Sensitivity	
NORMAL	Mono: 16.2dBf, IHF (1.8 μ V/75 Ω)
	Stereo: 36.2dBf, IHF (17.7 μ V/75 Ω)
Sensitivity (DIN)	
NORMAL	Mono: 0.9 μ V/75 Ω
	Stereo: 28 μ V/75 Ω
Signal-to-Noise Ratio	Mono: 84dB (at 80 dBf)
	Stereo: 78 dB (at 80 dBf)
Signal-to-Noise Ratio (DIN)	Mono: 72dB
	Stereo: 65dB
Distortion (at 80 dBf)	
NORMAL	Mono: 0.06%(1kHz)
	Stereo: 0.05%(1kHz)
NARROW	Mono: 0.2% (1 kHz)
	Stereo: 0.2% (1 kHz)
Alternate Channel Selectivity	
NORMAL	75dB (400 kHz)
NARROW	75dB (300 kHz)
Stereo Separation	65 dB (1 kHz)
Frequency Response	± 1 dB (20 Hz to 15 kHz)
image Response Ratio	80 dB
IF Response Ratio	95 dB
Subcarrier Product Ratio	75 dB
Antenna Input	75 unbalanced

AM Tuner Section

Frequency Range	531 kHz to 1,602 kHz (Step 9 kHz)
Sensitivity (IHF, Loop antenna)	200 μ V/m
Selectivity	40 dB
Signal-to-Noise Ratio	55 dB
Antenna	Loop Antenna

Audio Section

Output (Level/Impedance)	
FM (100 % MOD)	650 mV/0.45k Ω
AM (30 % MOD)	150mV/0.45k Ω

Miscellaneous

Power Requirements	AC 230 Volts, 50/60 Hz
Power Consumption	20W
Dimensions	420 (W) x 85.6 (H) x 340.4 (D) mm
Weight (without package)	3.7 kg

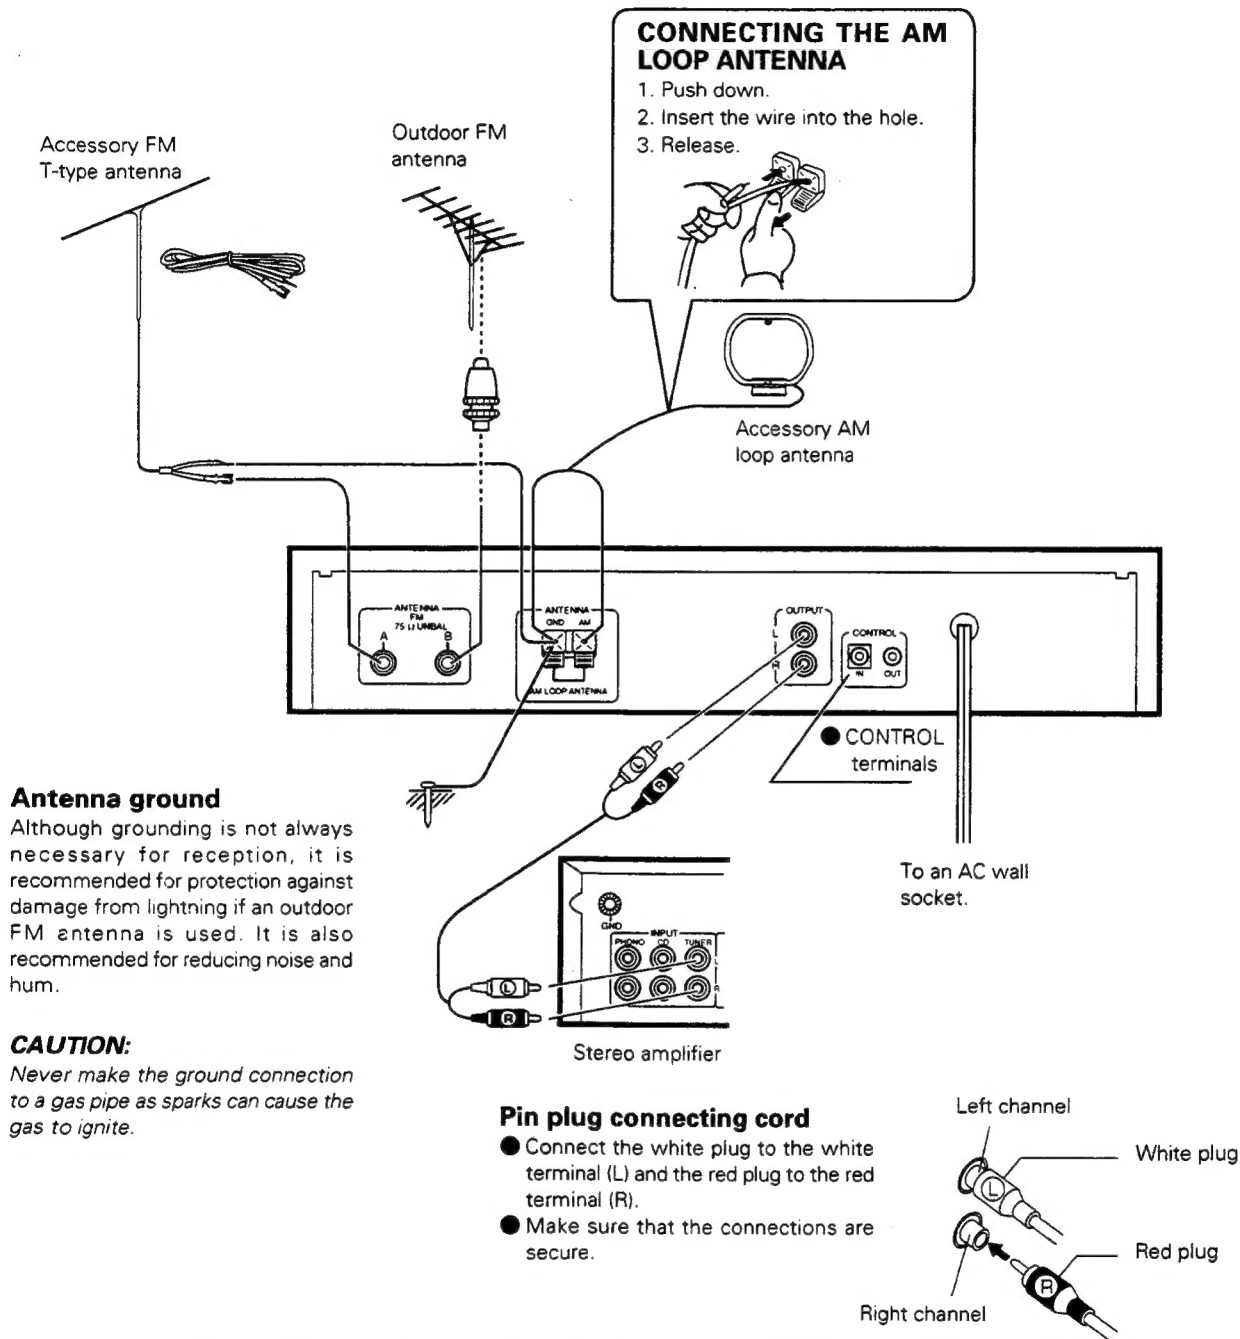

Furnished Parts

FM T-type Antenna	1
AM Loop Antenna	1
Connecting Cord with Pin Plugs	1
Control Cord	1
Operating Instructions	1

NOTE:

Specifications and design are subject to possible modifications without notice, due to improvements.

10. CONNECTIONS

CONTROL Terminals

When using together with a Pioneer component bearing the mark, connect the CONTROL IN terminal on the rear panel of the tuner to the CONTROL OUT terminal on the component using the supplied control cord. This will enable the tuner to be controlled from a distance with the remote control unit supplied with the component.

When this feature is not used, connection is not necessary.

- For instructions regarding connection and operation, please refer to the operating instruction manual of your stereo component.
